State of the Business

As 2025 comes to a close, Defense continues to deliver exceptional results across every line of business. From major contract extensions to successful aircraft deliveries and new growth opportunities on the horizon, each teammate has made tremendous progress advancing our mission to serve the warfighter with innovation, precision, and purpose. Defense remains on track to meet 2025 Annual Operating Plan (AOP) Bookings target of \$71M and exceed Sales and Profit AOP targets. **Great job Team Defense!**

Albers Community

We launched **Albers Community**, a team-member-driven program for charitable giving and volunteerism where we live and work. The mission: enhance lives and strengthen local communities through small, impactful donations and hands-on service. Get involved as a Volunteer, Board Member, Site Ambassador, or donor, and help shape where we give next. Learn more at alberscommunity.org.

Innovation: We aspire to create an environment that facilitates personal growth and Innovative solutions by challenging the status quo.

Dedication: We are dedicated to each other and the Mission at hand.

Excellence: True Excellence begins in the individual's heart and manifests through deeds and actions that spread to the team.

Stewardship: We respect everyone's time and talents and are good Stewards(hip) of these valuable resources.

Aviation Services

Our CLS roots continue to deliver! The team has had a strong quarter, highlighted by a one-year extension in Crane, Indiana supporting SAIC and the warfighter, plus a six-month extension at MCAS Beaufort—providing an unexpected boost in 2025 revenue. We also executed a new option year with V2X on the Navy AIMD contract at NAS Pensacola and Corpus Christi, marking the third consecutive option year on Albers' longest-running CLS program. Looking ahead, we're positioning for growth with two prime KRACEN bids (HMHT-302 and MALS Corrosion Control) expected to award in early 2026—both potential game changers for our CLS portfolio. Meanwhile, our MQ-9 Reaper support continues to make a global impact—keeping mission-critical ISR capabilities flying strong and supporting Combatant Commanders worldwide. It's a testament to the team's professionalism, technical excellence, and unwavering **"People First, Mission Always"** mindset.

Tactical Aircraft Solutions

Great momentum heading into the year-end! The UAE offset waiver was successfully resolved, unlocking FOS program execution for the rest of 2025. We wrapped up delivery of Virginia State Police Aircraft(VSP) #3 and completed the Concept Design Review for Royal Jordanian Air Force (RJAF) C-208 Amendment #5 — both major milestones for the team. On deck, TAS is pursuing several opportunities to close out the year including RJAF AT-802F firefighter aircraft, and RJAF C-208 Amendment #6. Q4 execution priorities include finishing the DACU8 Anti-Jam integration and new customer opportunities. Looking ahead to 2026, the goal is clear —grow the team with \$15M+ in new contracts and keep the wins coming!

Engineering Solutions

It's been a breakthrough quarter for the Engineering Solutions team. The MUOS SBIR Phase II award is officially in motion, extending our successful collaboration with BCubed. Meanwhile, GE Commercial and GEK800 programs are expanding with new starts and funding increases in Q4. We achieved GE Commercial breakthrough, transitioning from small exploratory projects into a full, multi-engineer contract through mid-2026. This is an opportunity to showcase our technical excellence and scale across GE's broader enterprise. In parallel, the team continues productive collaboration with Northrop Grumman on software development, with an initial test deployment planned for Q4. High-priority pursuits include Leidos (NISSC), Leonardo, Bell, and GenRad Infill—efforts that blend digital engineering, software licensing, and advanced system modeling. The focus for Q4 is lining up backlog for 2026, advancing digital engineering software, and setting the stage for a strong start to 2026. The first half of 2025 has been our best start ever, and we expect to accelerate through year end.

Connectivity Solutions

The Connectivity Solutions team continues to build momentum! Over the summer, leadership held an offsite in Littleton, Colorado—a valuable opportunity to strengthen alignment, trust, and collaboration. The session went beyond team-building, resulting in a clearer strategic roadmap, actionable goals, and renewed focus on innovation and execution across all projects. Across multiple Lockheed Martin sites, the team successfully completed several high-profile cable and fiber installations, earning outstanding customer feedback and recognition for professionalism and technical excellence. We also began phasing out the Nissan NV200 fleet, with new Ford vehicles now arriving. These upgraded trucks enhance our ability to move people and materials efficiently across campuses, supporting the continued growth and responsiveness of the Connectivity team. Looking ahead to 2026, Connectivity Solutions is focused on expanding infrastructure capabilities, strengthening key customer partnerships, and positioning for new program wins that align with Albers' rapid growth across the enterprise.

From Danny

Thank you for a great 2025. This year hasn't been without its challenges, but anything worth doing is going to be tough when the pressure is on. I'm truly grateful for our growing team and for the small, consistent efforts you make every day, leading yourselves, supporting our customers, and ultimately giving the warfighter what he or she needs to succeed. I'm also especially proud of Albers Community and the impact it's having in the hometowns where our teammates live and serve. If you haven't checked it out yet, visit alberscommunity.org. Come join us—we'd love to have you out there helping somebody. As we move into the holiday season, I hope you'll take some time to reflect on what you accomplished in 2025 (there's a lot to be proud of) and spend meaningful time with your family and friends. Enjoy that time—make memories and recharge your soul.

We do have a few key projects ramping up as the year closes, and your leadership team is focused on getting the mission done while taking care of our people. People First. Mission Always. That balance matters to us. The Defense Leadership Team is also reviewing our 2025 performance and setting our goals and priorities for 2026. We want your ideas. The best improvements always come from the people who do the work every day. If there's one thing you think we could do better as a company, send me a note directly at DJohnson@albers.aero with the subject line "INNOVATE." You'll also see a short culture survey coming your way soon. It's only 12 multiple-choice questions, and your participation alone sends a strong message. Please take a few minutes to share honest feedback—we read it, and it matters. We appreciate everything you do. Know that you are making a difference at Albers Aerospace, and our future is bright. Get Some!!
